Notice of Marine Construction

Pacific Coast Terminals (PCT) is reminding the local community about our dredging of the existing deep sea vessel channel from Reed Point Marina to the PCT vessel turning basin.

Working Hours Extended

The dredge project has been granted a two week extension from Vancouver Fraser Port Authority (VFPA) until March 14th, with the exemption to condition 34 of Permit #15-136, to allow dredging activity outside of the Burrard Inlet fisheries least risk window. VFPA understands that works outside of the fisheries least risk window are required to conclude the dredging activity and avoid remobilizing to site in August. This will prevent potential disruption to local recreational users and the adjacent community. All other works will be conducted in conformance with applicable regulatory requirements and permits from the VFPA, Permit #15-136, Environment Climate Change Canada, Transport Canada and Fisheries and Oceans Canada.

PCT will continue to keep the community updated through our website and our Channels newsletter. Should you require additional information on the terminal expansion and construction project, or if you would like to register a concern with the project, please visit our website www.pct.ca or call 604.939.7371. After business hours please call 604-931-9211. Thank you for your continued patience.

For questions regarding the port authority's permitting process, please contact their Permit Comments line at (604) 665-9570 or per@portvancouver.com
